# Plant Photo App

List Screen:

The screen displays a scrollable list of plants, showing each plant's name, image, and added date. Users can search for plants, tap a card to navigate to the Detail Screen (for viewing/updating plant info), or long-press to enable selection mode. In selection mode, checkboxes appear on cards, and a Delete Selected button allows bulk deletion. An Add New Plant button navigates to the Scan Screen for adding plants. The list is empty initially until plants are added.
